

Visualizations/Interfaces (data representations)
Cataloger – includes following: •Standard object metadata •Institution of Holding •Cataloger •Upload capabilities for Digital Object/Cover Scan
Standard (list of object metadata)
Geospatial – (mapped to geomap) •Coverage •Institution of Holding
Timeline – Date of publication
Gallery – Cover Scans / Digital Objects •displayed based on dataset
Ingest / Outgest interface •CSV •MARC •LibraryThing •other

Authority Records
Some Object Fields
• Title
•Creator(s)
•Subjects/Genres
•Publisher(s)
•Type
•Format/Physical Description
•Language (ISO 639-1)
•Coverage (as City, Country)
•Rights
Institution of Holding

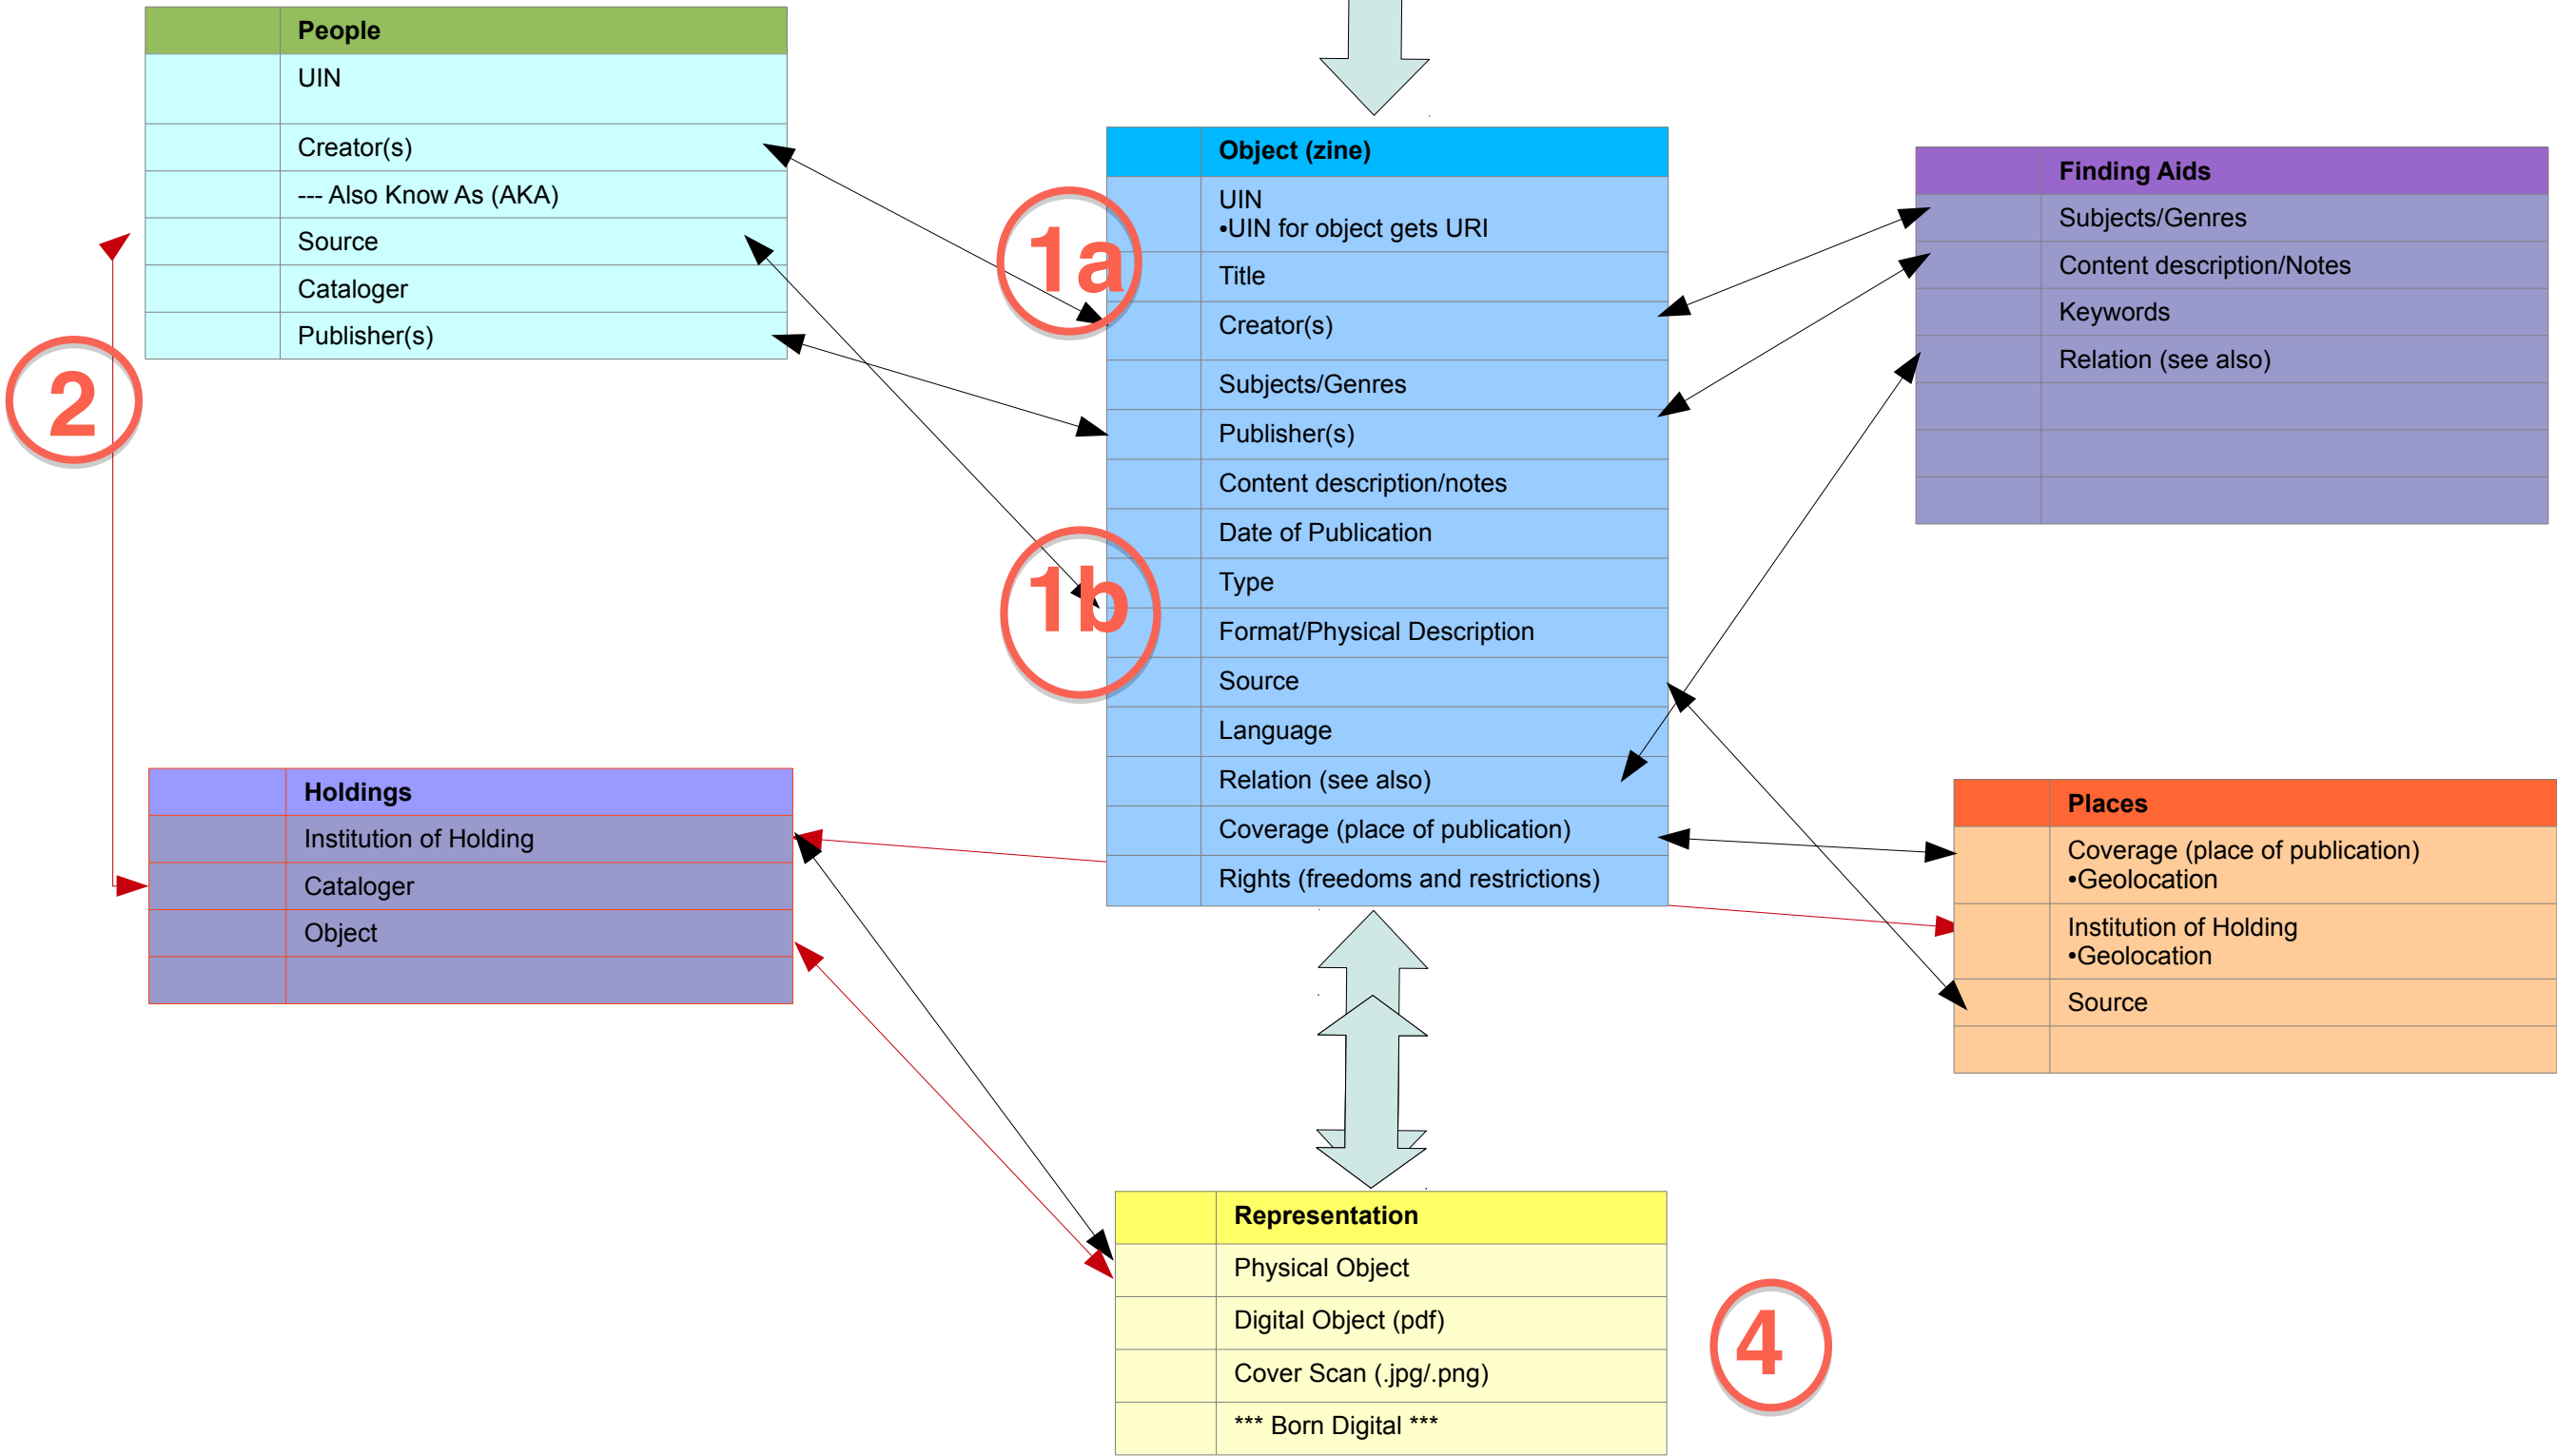

Zinecore will attempt to be THE Authority Record, but in the process will use other standards and authority records:

Collections
Objects
People • Creator(s) • Publisher(s) • Source (Donor?) • Cataloger
Places • Coverage • Source
Representations

- Collections are made up of:
- Objects
  - People
  - Places
  - Representations

Collections would apply to an entire individual archive's holding records, and may also apply to internal collections from an individual archive. Example: QZAP's total holdings is a collection to the larger Union Catalog, but one of their sub-collections (say the Martin Macor Collection) would also be a whole collection.
